<b>Cold</b>							

No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

# **WEATHER KEY POINTS**

**05/02/22 - 05/08/22**

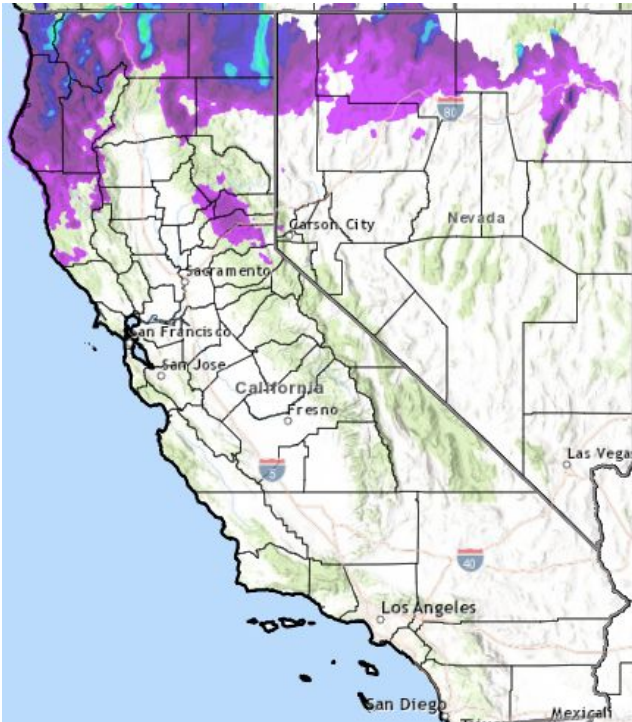

## **Monday - Sunday**

- Minor heat impacts will continue across primarily interior valleys/deserts of Southern and Inland regions through much of the week
  - Locally moderate heat risk concerns could develop for Thursday through Saturday in the deserts of Southern Region
- Most of the state will remain dry through the next week, but a series of storm systems will bring periods of mostly light precipitation to far northern California
  - The best periods of precipitation along the Oregon border currently look to be on Monday and Thursday/Friday
  - Each of these storms will also bring periods of gusty winds to much of the state, though most wind impacts appear minor
    - The strongest winds will generally be seen across the higher terrain (including much of the Sierra on Monday) and interior portions of southern California, as well as locally stronger winds in locations such as Santa Barbara County and the Antelope Valley through Monday
    - Areas of blowing dust are possible across desert areas, especially Monday afternoon/evening

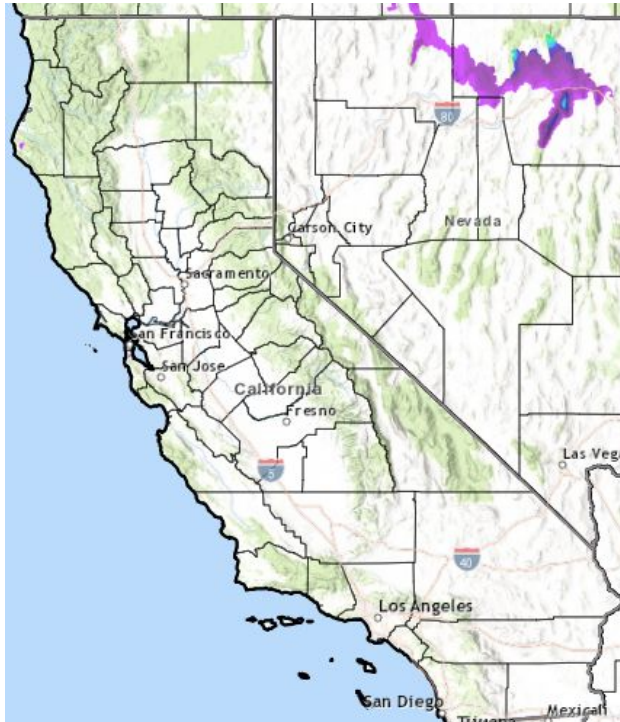

# PRECIPITATION FORECAST

05/02/22 - 05/04/22

**Monday**

**Tuesday**

**Wednesday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**05/07/22 - 05/15/22**

## **6-10 Day Outlook (May 7 - May 11)**

### **Temperatures**

- Below normal temperatures favored for most of the state, with near normal temperatures favored for coastal southern California

### **Precipitation**

- Near normal precipitation is favored for much of the state, except below normal precipitation favored for central California

## **8-14 Day Outlook (May 9 – May 15)**

### **Temperatures**

- Above normal temperatures are favored for central California, with near normal temperatures favored for far northern and southern California

### **Precipitation**

- Below normal precipitation is favored for the northern two-thirds of the state, with near normal precipitation favored for southern California
